

Report Simple WPA crack :

Put your wireless card into monitor mode :

```
(f1n1l0@kali)-[~]
$ sudo airmon-ng start wlan0

Found 2 processes that could cause trouble.
Kill them using 'airmon-ng check kill' before putting
the card in monitor mode, they will interfere by changing channels
and sometimes putting the interface back in managed mode

Since there's no packets I've tried to force packets still the same problem

```

After connecting some devices to the network we got some packets but they are not enough :

BSSID	PWR	RXQ	Beacons	#Data, #/s	CH	MB	ENC	CIPHER	AUTH	ESSID

64:51:7E:1B:B7:71	A0:02:A5:58:C1:2C			-41	0 - 1		3	264		

I tried to inject some packets but my laptop does not support packet injection when I tried to do it we notice that the mode switch from monitor to managed mode (the monitor interface is being destroyed or switched automatically

```
(fmin10@kali)-[~]
$ sudo aireplay-ng -9 wlan0mon
